Acknowledgments

We would like to extend a special thanks to the following people for contributing their time, efforts, love and devotion to this project. The quality of this manual was improved tremendously due to their efforts and invaluable remarks.

Thank you!

The Faculty

Fabian Lopez-Najera

NOTICE OF RIGHTS
All rights reserved. No part of this manual may be reproduced or transmitted in any form by any means, electronic, mechanical, photocopying, recording, or otherwise, without the written permission of the publishers.

DEVICE DISCLAIMER
The device is to be used as a Biofeedback device. It is designed for stress reduction, relaxation training and muscle reeducation. The device does not diagnose anyone. The system is calibrated to measure the fine and subtle electrical reactions. Trained staff should use this device. No claims are made of the system or its results and nothing that the practitioner does is meant to either diagnose or treat any illness or disease, and is not intended to replace any treatment from a medical doctor. One should always follow the advice of their doctor.

CONTENT DISCLAIMER
The information contained in this manual is intended only for the education of Quantum Biofeedback Technicians and Specialists. The authors do not advocate the use of any particular healthcare protocol, usage of remedies, or combination thereof. The authors do not warrant the effectiveness or safety of any protocols or remedies contained in this manual. The information contained herein shall not substitute for consultation with a physician or other qualified healthcare provider. Any attempt to diagnose and treat an illness should be done under the direction of an authorized healthcare professional.

USE OF PROTOCOLS
The stress reduction training exercises contained herein are not designed to run for periods exceeding approximately one hour and with more frequency than once per week. Practitioner judgment should be exercised in determining the length and frequency of running the stress reduction training exercises.
Welcome to The Quantum Academies and the Intermediate and Advanced Training! You will be studying with some of the world’s best Certified Instructors in the field. Our instructors will walk you through many doors of enhancement with Quantum Biofeedback so that you will, from now on, know what to do with this incredible technology and the many amazing stress reduction programs offered.

This course will be very easy to follow, as we have laid out the groundwork for you in the simplest format possible. It’s designed to enhance your stress reduction skills, but like most art forms, the more you practice, the better of a Biofeedback Specialist you will become. We are certain that once you are finished with our complete program, you will become a skillful Biofeedback Specialist and ready to work on your clients in the field of stress reduction.

We hope that this course meets your expectations and we greatly appreciate your commitment!

# CHAPTER 1: ADVANCED APPLICATIONS

- "Harmonic Coupling" From The Test Matrix  
- "Expand Name" From The Matrix  
- "Zap" Training The Top 30 And/Or 250 Items From The Matrix  
- Additional Programs From The “SCIO Is Working” Box  
- Antiaging Training Program  
- Dark Field “Analysis” Training Program  
  - Option A: Immune Stim + Blood Cleanse  
  - Option B: Stem Cell Stimulation  
- DNA Signatures Training Program  
  - Option A: Correction And Stabilization  
  - Option B: Stimulation And Stabilization  
- Dental “Treatment” (Training) Of The Clifford Report  
- Body Scan And Face "Therapy" (Training Programs)
CHAPTER 2: DENTAL & TMJ

Dental Program

1) Accessing The Dental Program From The Test Matrix
2) Activating The Point Probe (Optional)
3) Definitions Of Terms
4) Balancing Dental Nosode Signatures
5) Balancing Dental Isodes Signatures
6) Balancing Dental Sarcode Signatures
7) Piggy Back Programs
8) Specific Programs For Point Probes
9) More Specific Tooth Programs: Teeth Tables
Concept: Symmetry Theory

Teeth Chart With TCM Meridian And Organ Associations

10) Clifford Report
11) Dental Pictures
CHAPTER 3: DARKFIELD AND BLOOD ANALYSIS PROGRAMS

Pleomorphism, Its Discovery And Repression 82
1) Dark Field Panel 84
2) File Descriptions 84
3) Transferring Items To Test Matrix 89
4) Dark Field - Plio Morph Panel 90
5) Recommended Action 91
6) Potential Disease Factors

7) Blood “Treatment” (Blood Signature Training Program)

8) Blood Analysis Program: (Training Program)

If You Have Lab Reports To Enter Then, Proceed Here

If You Do Not Have Lab Results To Enter Then, Proceed Here

Program Options

Reference: Blood

Reference: Urine

CHAPTER 4: HOMOTOXICOLOGY

Homotoxicology By Professor William Nelson

Homotoxicology Background

Understanding Homotoxicology

Six-Phase Table

1) Homotoxicology Through Risk Profile

2) Xenobiotics

3) Miasms / Stimulate Detox Training

4) Bio Terrain

“Stem Cell” Signature Training Program:

Miasms Quick Definitions

5) Homotoxicology Reactivity

6) Specialized Xenobiotics Signature Training With Timed Programs

Specialized Xenobiotics Matrix Item Numbers

</table>
The Dental program was added as a tool intended to be used by Dental professionals. However, many Practitioners have found the program very helpful to their clients, as the Dental program can be a very powerful stress reduction tool.

The tendency toward either cavities or periodontal disease (pockets) is established in the first months of lactation. Gum disease is considered reversible and seems to respond well to Vitamin C and COQ 10 supplementation.

TMJ is known as ‘the great imposter’ in that it can trigger a number of seemingly unrelated issues like headaches, hip pain, and back pain.

Root Canals can be problematic, and dentists admit 15% are chronically infected. According to TCM a dead tooth is an energetically ‘dead fuse’ in the associated Meridian. If you are considering removing Root Canalled teeth that are temperature sensitive or occasionally sensitive, consult with a biological dentist. Biological dentists are ‘Naturopathic dentist’; who are trained in these procedures.

1) ACCESSING THE DENTAL PROGRAM FROM THE TEST MATRIX
2) ACTIVATING THE POINT PROBE (OPTIONAL)

The Point Probes are a way to localize the energy and benefit a variety of Quantum programs. Using the different attachments can widen the scope of applications and increase the efficacy of various programs. Since it is not possible to properly sterilize the attachments without an autoclave; these probes should not be used inside the oral cavity. Consider that the dental attachments are still effective used on the skin surface over the jaw.

To activate the point probe from the Dental Screen:
- Body and Face Scan (upper bar)
- Point Probe Active (Note: this option does not always “appear”; if you click one of the actual point probe programs it automatically activates and then it appears here)
  - Insert one end of the cable with banana plug tips into the bottom of the Caress Kit handle (the handle receives the various point probe tips and attachments) and insert the other end into the Red output slot on the back of the SCIO device.
  - The point probe can be used at any time during the session.

3) DEFINITIONS OF TERMS

Nosode: Homeopathics originally made from pathogens – virus, bacteria, fungus, worms, diseased tissue, etc.

Sarcode: Homeopathics originally made from healthy tissue/organ samples.

Isode: Homeopathics originally made from inorganic compounds – synthetic toxins

Allersodes: Homeopathics originally made from items that may elicit hyper-reactivity, such as airborne allergens and the like.

NOTE: Reactivity to these items may be significant.

4) BALANCING DENTAL NOSODE SIGNATURES

These may indicate stress from potential infection or degeneration.
Information
Load all Dental Nosode Signatures by Value
To highlight highest value
“Test” (This will do an Individual Reaction on the nosode signature for reactivity. Over 75 would be considered Reactive and may require further training.)
Zap (This turns the “Test” button into a “Zap” (Train) button.
Zap (This will begin a 3-minute balance)
Unzap (This will change the Zap button back to a Test button so that you can run an Individual Reaction test on the next item to test Reactivity.)
• Repeat this process with two or three of the most reactive Nosode signatures.
Test (top menu bar)
Individual Reaction Test (to see display percentage of improvement)

5) BALANCING DENTAL ISODES SIGNATURES

This will indicate reactive values to potentially toxic Dental Isode (Material) signatures.

Information
Load all Dental Isodes Signatures by Value
To highlight highest value
Test (This will do an Individual Reaction on the item for reactivity. Over 75 would be considered a Reactive item and may require further training.)
Zap (This turns the Test button into a Zap button.)
Zap (This will begin a 3-minute Training)
Unzap (This will change the Zap button back to a Test button so that you can run an Individual Reaction test on the next item to test Reactivity.)
• Repeat this process with two or three of the most reactive Isode signatures.

6) BALANCING DENTAL SARCODE SIGNATURES

This may reveal specific Dental tissue / teeth sarcode signature reactions. These have been theorized to be energetically connected to other parts of the body.

Information
Load all Dental Sarcode Signatures by Value
To highlight highest value
Test (This will do an Individual Reaction on the item for reactivity. Over 75 would be a Reactive item and should be balanced.)
Zap (This turns the Test button into a Zap button.)
Zap (This will begin a 3-minute balance)
Unzap (This will change the Zap button back to a Test button so that you can run an Individual Reaction test on the next item to test Reactivity.)
- Repeat this process with two or three of the most reactive Sarcode signatures.

7) PIGGY BACK PROGRAMS

- Therapies (tab on top menu bar)
- Piggy Back Programs
  - Type in all known Nosodes, Isodes, Allersodes, Symptoms, Nutrition and Misc. matrix signatures (always double space between entries)
- Load
- OK
- Close

8) SPECIFIC PROGRAMS FOR POINT PROBES

- Therapies (top menu bar)
  - Choose from any of the following options:
    - Point Probe Treatment of item in Test Matrix
    - Cavity Zap Point Probe
    - Gingivitis Point Probe
9) MORE SPECIFIC TOOTH PROGRAMS: TEETH TABLES

- Information
- Teeth Tables
- Dental Foci
  - This panel is for information only. Read the information and note reactive items.
- Click on colored (pink or white) panel to return back to the blue panel.
- On the highest reactive number values in RED to balance the reactivity of the Five Functional Teeth Terminals.
  - This will balance the reactivity for each Terminal and its associated links such as Sense, Spine, Joint, Mind, Sinus, Tonsil, Oral Acu#, Endocrine and Teeth # signatures.
- Teeth Chart

CONCEPT: SYMMETRY THEORY:

The principle of “Symmetry Theory” states that our bodies strive to maintain proportional balance between both the left and right sides. Therefore, symptoms can express on the opposite side from where the most stress is, as the body’s attempt to balance it’s “symmetry”.

For example, pain can express on the right side, when stress is often occurring on the opposite left side, sometimes without symptoms, but is often observable through biofeedback reactivity (high numbers on the opposite side). For this reason, it is helpful to closely observe (and train) the high stress reactions on the opposite side from where the client’s symptoms are, as this often can be a cause of stress and imbalance. This theory can also be considered in light of other forms of stress and pain throughout the body.

- The selection box of a specific concern. For example, you can check off “Infection Search” or you may choose more than one, such as “Infection Search + Inflammation Search”.
- Test and Treat (This will display the relevant reactive values.)
- Red Add 5 (Continue until only a few reds remain. These are energetically the most significant teeth signatures in need of balancing.)
- On the name of any tooth signature with a high reactive value to balance.
  - Optional: Use Point Probe on the outside of the mouth over the tooth area.
  - Reset Red Button will restore red overlay on all values.
  - Remove Red will remove the red overlay on all items.
• Close back to Dental.

[Acupuncture Tooth-Organ Relationship Table]

Abridged from various sources. credits to sources are available.
10) CLIFFORD REPORT

A Clifford Report (Clifford Materials Reactivity Testing-CMRT) helps determine reactivity to specific dental isode signatures.

Information
Test Clifford Report (This will test reactions to the dental Isodes signatures.)
Information
Current Clifford Results (This will display the reactivity scores.)
Information
Search for Foci
White background of teeth panel to remove.
Memos (top menu bar)
Report Memo (Scroll right to see full report.)
Therapies (top menu bar)
“SCIO” Treat Memo Items and balance reactivity to all major risks
OK
The “SCIO is Working” box now appears.
Start Dental Treat (in the SCIO is Working Box)
- Observe the information that appears at the bottom of the SCIO is Working Box.
- Rectify to 100.
End Dental Treat
End (on SCIO is Working Box)

11) DENTAL PICTURES

Note: This does not display “Reactions”; you must search for and choose known issues if you wish to utilize these training programs.

- Information
- More Dental Pics + RX (This will take you to Short Sarcodes.)
- Next Dental Pic. (Scroll through and balance reactivity to the dental signatures.)
- Treat and Scan (“Train”)
The goal is maximum ‘repaired’.
  - Close back to Dental.

12) TMJ SCAN: MUSCLE RE-EDUCATION

This scans for reactivity and trains to disperse Energetic Foci (areas of congested or concentrated bio-energy, accompanying stress, trauma or inflammation). This also checks reactions to more general Cranial Sacral signatures and can be used to train for muscle reeducation and relaxation.

TMJ (top menu bar)
Show TMJ Scan
Scan Total (drop down list)

Scan and Treat (This button is located on the mid-left side of the screen. Continue until the red foci circle disappears.)

Cranium Side Temporal
- Go through each gray tab and “Scan and Treat” until red foci circle disappears on each view.

Cranium Front Temporal
- Go through each gray tab and “Scan and Treat” until red foci circle disappears on each view.

Jaw Top View
- Go through each gray tab and “Scan and Treat” until red foci circle disappears on each view.

Maxilla Side View
- Go through each gray tab and “Scan and Treat” until red foci circle disappears on each view.

Jaw Side View
- Go through each gray tab and “Scan and Treat” until red foci circle disappears on each view.

Maxilla Under View
- Go through each gray tab and “Scan and Treat” until red foci circle disappears on each view.

13) TMJ MUSCLE SARCODES:

TMJ MUSCLE SARCODES:

Show TMJ Muscle Sarcode Panel
- A list of the muscles and tissues sarcode signatures involved with the TMJ complex as well as the reactive values for these items will appear.

Start TMJ Test
- As you go through each step have the client hold the posture described, within their comfort zone.
- Each posture will reveal the degree of stress registered by a reaction to the muscles sarcode signatures.

Clench Back Teeth
Option: If you want to see the degree of change (from relaxed position to strained position) with a given posture, select ‘Dif Clench Back
On the most reactive high (positive) values for each jaw position to Reeducate.

Protrude Jaw

On the most reactive high (positive) values for each jaw position to Reeducate.

Move Jaw to left

On the most reactive high (positive) values for each jaw position to Reeducate.

Move Jaw to right

On the most reactive high (positive) values for each jaw position to Reeducate.

Open Mouth Wide

On the most reactive high (positive) values for each jaw position to Reeducate.

Frown

On the most reactive high (positive) values for each jaw position to Reeducate.

Smile 😊

On the most reactive high (positive) values for each jaw position to Reeducate.

Note: If you want to see the degree of change (from relaxed position to strained position) with a given posture, select ‘Dif Clench Back, front, left, right, etc.

Results – A green panel appears with further stress reduction options. Set timer for 2 minutes (or more) in order to activate the buttons. Once activated, the timer can be returned to 1 minute if preferred.

Note: These programs are also available under the ‘Therapy’ drop down menu without having to enter the TMJ Muscle Sarcode Program.)

TIP! It is wise to avoid overstimulation of these muscles on clients with a history of heavy amalgam dental fillings. The body strives to protect the brain and the blood, and mercury traces can often be stored in the muscles for this reason. If the client does not rectify upon 3 clicks of any of the muscles, consider moving onto the next reactive muscle to avoid the inadvertent release of possible stored excess mercury.

OPTIONAL

(Note: Set Timer for 2 Minutes to Activate Buttons. Once activated, the timer can be returned to 1 minute, if preferred.)

Tab / “Therapies” (Trainings)
Balance Muscle Treatment RX
Trauma Repair RX
Pain Reduction
Nerval Repair RX
Close green panel.

(Note: On certain versions of the Clasp32 program, if you notice that the time initially selected has already expired and the blue progress bar is no longer progressing, you may have to stop the program manually, by clicking on ‘return to dental’, inside the ‘SCIO is Working’ box.)

Acupoints

Have the client locate and massage the Acupressure points as you click them. Show clients where these points are located so they can address them at home between sessions.

Mercury Removal

Check Quadrants for Mercury Removal Order
• This program will show stress based on reactivity to isode, muscle, tooth, and other dental signatures.
• The quadrant with number 1 would be the highest level of reactivity.
• Any quadrant with number 2 would be second priority, and so on with 3 and 4.
• If you have two quadrants with the same number they are of the same priority reactivity-wise, and you would choose which to consider.

Alternative Path:
⁻⁻ Information
⁻⁻ Removing Amalgams
⁻⁻ Information
⁻⁻ Teeth Tables

Option: The Jaw picture in the TMJ Muscle Program is a Displacement training program. If the TMJ was due to an injury click the direction of injury as ‘Displacement Left’ (for a right sided blow) or ‘Displacement Right’ for a blow to the left side.
⁻⁻⁻ On Jaw to balance.
Only a Dentist could determine the MM of displacement.
⁻⁻ Close back to the Test Matrix.

14) SPECIAL APPLICATIONS: DISEASE DICTIONARY

• Open the Disease Dictionary from top menu bar on the Test Matrix Screen.
• Disease Probability and Dictionary
• Options: Dental Root, Abscess, Bacterial Infections Acute and Chronic, Infection, Joint Disease, Metal Detoxification, TMJ, Toothache, Saliva Glands or Taste Disorder signature training.
• Train from the “Electroacupuncture + Bioresonance” selection.
• Once running, the Disease Dictionary Program can be placed in the “background” visually by clicking “Consciousness” on the task bar. (This removes the Disease Dictionary program from view as it continues to run. If you wish to return to it after your selection has rectified, you can bring it into view again by clicking the “Disease” icon on your bottom task bar.)

15) SPECIAL APPLICATIONS: “SCIO” OPERATIONS

BodyViewer program:
⁻⁻ Program Start
⁻⁻ Load Ind. Movie Program
⁻⁻ Organ Systems
Dentition Jaw Oral, Teeth and/or TMJ
Therapies
Anti Infection
Consciousness (on task bar) to send to the background.

Iridology Program:
Dental
Auto Search
Activate Piggy Bank

16) ZAP TRAINING PROGRAMS FROM THE MATRIX

Auto focus Zap Mode Training (top menu bar)
- Choose from the following:
- Point probe Zap Active (to activate the probe)
Auto Zap Cavities (Training)
Auto Zap Dental Disease (Training)
Auto Zap Dental Sarcodes (Training)
Gingivitis (Training)
Auto Zap Infection emphasis – top Bacteria (5 min)

TIP!
Each selection provides a 5-minute program. You may choose to use the accessories; roller, probes, pain pads or small animal pad. If you do not have any of those you could ask the client to place the headband on the jaw to localize the programs.

17) SPECIAL APPLICATIONS: TEST MATRIX AND HOMEOPATHY SIGNATURE TRAINING

- Click on “Dental Nosode” from the Subfile.
- Place your cursor on an item to highlight it. Perform a 7 second Zap Training (“Treat”) then conduct an “Individual Reaction” to the item. Balance reactivity and consider a Homeopathic Signature Duplication of the item.

18) SPECIAL APPLICATION - RIFE FREQUENCIES

TIP! To more closely simulate the theory of Rife’s original work, enter 2,400,000 into both upper and lower Scalar Generator boxes and then the specific “Rife frequency” number in the Rife boxes. Rife theorized that this scalar
number created a high frequency carrier wave that facilitated the intercellular penetration of his frequencies, thus taking them deeper into the organs and cells.

- Therapy screen: Manual Rife applications.
- Test Matrix/Programs/Therapy
- Enter frequencies below in the Rife boxes.
- Enter 2,400,000 into both upper and lower Scalar boxes to create a ‘carrier wave’.
- Type in “33” into the “Amplify in DB: field
- Type in “120” into the “Set Program #” field.
  Set the timer for 5 min.

EXPLANATION

BICOM + MORA:

- Amplify in Db (Decibels = sound): 33 (This is the standard established minimum.)
- Set Program#: 120 (Basic Balancing)
  Intermittent (In Rife Theory to creates a pulse.)
- Note: Wobble On (In Rife Theory creates a sweep.)
If using a 10 point sweep with Rife numbers in the Rife boxes (for pathogens), then select ‘Intermittent’.
Automatic Interaction (This setting allows for the automatic choice of the client through unconscious reactivity.)

To create a “sweep” consider entering a value 5 over and 5 under the actual rife number. Place the higher value in the box for the Upper Frequency and lower value in box for the Lower frequency.

The following list of settings for “general dental problems” was obtained from the Handbook of Rife Frequency Healing, by Nina Silver:

19) SPECIAL APPLICATION - HARMONIC RATES

EXPLANATION

'Harmonic Rates' are number sequences that capture the energetic 'shape' or essences of substances, conditions, even thoughts and intentions. They operate non-physically, and non-locally (can be broadcast by computer or by intent as well).

On the Therapy page, enter the following rates by typing the corresponding numbers (double spacing between selections) into the Primary Disease box of the Trivector and Hololinguistic Program box. Select “Add to Schuman Wave”. These will now run in the background of your entire session.

<table>

HOME WORK READING

GENERAL DENTAL MERCURY REMOVAL CONSIDERATIONS
By Bill Nelson

1. The quadrant containing the highest single reading should be removed first and further quadrants in descending order, as indicated on the chart. (Dental program) This sequential removal may be crucial in mercury toxic clients.

2. Where possible a rubber dam should be used, in conjunction with an efficient high volume evacuation, and high-speed cutting tool with water coolant spray, to protect the client from the aerosol.

3. When the client is extremely hypersensitive to mercury, they may react during the program. If there are signs of an adverse reaction, give six grams of sodium ascorbate, (Vitamin C) in a glass of water. Charcoal, Bentonite, Adrenal + Liver balancing can also assist.

4. Negative current excites nerves. When fillings are removed from teeth with high negatives, the tooth may become hypersensitive, which may be avoided by inserting a temporary dressing for about two months.

5. If any other metal is used as a restorative material, all amalgams should be removed first.

WHEN DRILLING OUT AMALGAM:
6. Cover the client’s eyes with a damp cotton wool, or use wrap around goggles.

7. Use R.A. nosepiece with tubing attached, to extend out of operating area, or work using oxygen flow or charcoal filter.

8. Confirm that the client has been advised on detoxification procedures.

9. Use comfortable music The QX VRI or other comforting distraction. The program can help with pain and other tension as well.
DENTAL PRE and POST-TREATMENT PLAN
HOMEOPATHIC DENTAL AMALGAM (NV) # 603

Six drops twice a day, either under the tongue, or in a little water. Separate from food by one hour either side. Start seven days before dental treatment and include day of treatment. Continue same dose for three weeks, if dental treatment scheduled, take it on that day.

HOMEOPATHIC DENTAL INJURY (NV)
Six drops twice a day, either under the tongue, or in a little water, for the stimulation of healing. Separate from food by one hour either side. Start seven days before dental treatment and include day of treatment. Continue same dose for three weeks, if dental treatment scheduled, take it on that day.

- See also the following Matrix items;
  - TMJ (NV) #755
  - Dentotox / Root Canal / Guna # 6652
  - Dental Sack Nosode #2937
  - Dentotox 4 Dental Drainage / Guna # 6642
  - Periodontal Disease Nosode # 2922
  - Dentotox 11 Nerve Sedative / Guna # 6649

CHARCOAL
Take 3 charcoal tablets half an hour before any dental treatment involving amalgam removal and 3 in morning and three at bed for 2 weeks after.

BENTONITE CLAY
Take three bentonite tablets half an hour before any dental treatment involving amalgam removal and one in the morning and 3 at bed for 2 weeks after.

GLUTATHIONE PEROXIDASE
Dose: 1 with water half an hour before breakfast. Start 2 days before treatment involving amalgam removal. Continue for 2 days after treatment, that is five days in all.

ORGANIC CHELATED SELENIUM ZINC and VITAMIN E
No more than 50 mcg of organically bound selenium, 25 mg of zinc, and 400 iu of Vitamin E a day at bed with 10 oz. of water. Use for 5 days after. This will prevent kidney toxicity of the selenium.

FATTY ACID LIQUESCENCE
30 drops a day for 1 week before and for 1 month after.
VITAMIN C POWDER
Start right away, Dosage: 1/4 teaspoon (1 gram) once a day. Or use 1000mg chewable. On treatment days: 1/4 teaspoon before and 1/4 teaspoon after treatment.

MAGNESIUM SUCCINATE
Start: On each day of treatment
Dose: 2 capsules 2 hours before treatment
   2 capsules within 2 hours after treatment, then drink one pint of water over the following two hours
   Support adrenal, liver, kidney and lymph when needed.

GOOD NATURAL MULTIVITAMIN & MINERAL
Start: 8 days before treatment
Dose: 1 per day in the morning (with food)
   Continue for 6 weeks after treatment

CORIANDER (CILANTRO)
- This must be fresh and preferably organic if you can get it. (It is very easy to grow at home in a sunny position) - dried coriander does NOT work well
- Fresh is better.
- Research published late in 1996 has shown that Coriander has a wonderful capacity to remove heavy metals and especially mercury from the body. This is a revolutionary discovery and makes Cilantro the first known substance that mobilizes mercury from the CNS. The active principle is unknown.

RECIPE FOR CILANTRO-PESTO
- Buy fresh organic Cilantro.
- Use equal parts black olives.
- Wash.
- Put in blender with small amount of water, dash of sea salt
   (Celtic salt is good) and olive oil and Fatty Acid Liq. (NV) 20 drops,
- Blend until creamy. Take 1 tablespoon 3 times a day with meals.
- Do not heat, spread on bread or crackers, use on salad.
- More often, if brain severely compromised; depression, Alzheimer's disease, "fogginess", etc.

ALTERNATE PESTO RECIPE
Coriander - 1 bunch
10 Black Olives
Garlic - to taste
Black pepper to taste
Coconut desiccated ½ cup
Lime ½ juiced
Olive Oil - cold pressed
Fatty Acid Liq. 20 drops
- Any black vegetable such as black pepper and black olives are black from excess selenium and chromium, the organic binding will not stress the kidney but assist detox of heavy metals, and Guinness beer also will help - no more than 2 pints a day.

- Blend all together and keep refrigerated for 1 week.

- Note: It is important to continue with detoxification after removal of fillings in order to remove mercury, which has built up over the years.

- Note: Some discomfort may occur if mercury is detoxed too fast. Some examples of discomfort would be: low back pain, brain fog or under eye circles, in which case, the detox should be stopped and the kidneys would need to be drained until resuming. There are several natural formulas, which can assist in this process.
